Experience

Capital One

Feb 2025 – Present

Software Engineer

McLean, VA

- Engineered and maintained Chamber of Secrets, Capital One's enterprise secrets management platform, using Go, enabling secure secret creation, rotation, deletion, and access across engineering teams.
- Applied secure-by-design principles and enforced security invariants across service layers, strengthening authentication, access control, and data protection workflows.
- Implemented backend enhancements and resolved high-priority production issues, improving platform reliability, diagnosability, and operational stability while reducing support load.
- Leveraged AWS Secrets Manager and CloudWatch to improve observability, auditability, and threat detection across the secret lifecycle.
- Streamlined CI/CD pipelines using Jenkins and GitHub, enabling safer, faster, and more consistent deployments.
- Contributed to React-based frontend improvements and developer documentation, improving usability, accessibility, and self-service adoption.

MicroStrategy

May 2024 – Aug 2024

AI Software Engineer Intern

Tysons, VA

- Built an AI-powered natural language chatbot for Auto Dashboard using React, Node.js, and OpenAI, enabling automated dashboard generation.
- Designed and implemented dynamic multi-page SPA workflows, improving dashboard creation time by 90%.
- Developed responsive UI components and data flows using modern React patterns, improving user experience and performance.
- Integrated frontend with RESTful APIs and asynchronous data pipelines for real-time dashboard rendering.

IBM

Oct 2023 – Dec 2023

Software Engineer Intern

Washington, D.C.

- Built AWS Lambda-based pipelines to securely process and extract structured data from Hyperscience documents.
- Containerized workloads with Docker to improve deployment consistency and system reliability.
- Developed high-performance data processing scripts that analyzed 52,000+ JSON files, reducing processing time from months to minutes.

Projects

Interactive SBOM Analyzer | *Javascript, Python, React, Django, D3.js*

- Developed a full-stack security analysis platform to visualize SPDX and CycloneDX SBOMs as interactive dependency trees.
- Built a React single-page application (SPA) with dynamic rendering of deeply nested dependency graphs.
- Implemented backend parsing pipelines to surface transitive vulnerabilities and license risks for security teams.
- Improved software supply chain visibility and accelerated vulnerability triage workflows.

Education

William & Mary

Sep 2021 – Dec 2024

Bachelor of Science in Computer Science

Williamsburg, VA

Certifications

AWS Certified Solutions Architect - Associate

Technical Skills

Languages: Python, Go, Java, C, HTML/CSS, JavaScript, Typescript, SQL

Technologies/Frameworks: AWS, React, Node.js, REST Apis, GitHub, Jenkins, Docker, LangChain

Developer Tools: VS Code, Eclipse, Android Studio

Competitions

International Collegiate Programming Contest (ICPC) NA Big South 2023 - Division 2

Feb 2024

Team Baffled

- Achieved **1st** place on-site, **3rd** place in the Mid-Atlantic region, and **5th** place overall conference.
